Plan your home painting project

For homeowners and condo owners. Fill in what you know; leave anything undecided blank.

Home address / condo unit

Your name / date

Preferred dates / move-in deadline

Budget range (if you have one)

1. What would you like painted?

List walls, ceilings, doors or trim (such as baseboards). Mark each area: must do, maybe or later.

Room / area	What to paint	Damage / concerns	Priority

Consider living and dining rooms, bedrooms, kitchen, bathrooms, halls, stairs and closets.

Anything to leave out, or ask for as a separate price?

Choose paint with your painter

You do not need paint products or colour codes ready before asking for an estimate.

2. Paint choices - Complete with your painter

Your painter can recommend products. Finish means how flat or shiny the paint looks.

Room / what to paint	Paint brand / product	Colour name / code	Finish (e.g. matte)

Use a separate row for walls, ceilings, doors or trim if the paint or colour will differ.

Primer and special products - Complete with your painter

Does any area need a base coat (primer) or a special product? Record what and where.

Who supplies the paint?

Who confirms the choices, and by what date?

Where will labelled leftover paint be kept?

Get ready for the work

Talk through these details with your painter. For condos, check any building requirements.

3. Who does what, and when?

Who moves furniture and protects floors?

Who removes pictures and stores valuables?

Getting in / parking / pets / rooms you need to use

Condo: work hours / elevator booking / contact

Start date / which rooms will be painted first?

When will you review the finished work together?

4. Your notes and questions

Use this space for estimate questions, ideas, agreed changes or advice from your painter.

Notes / next steps - add who will follow up and when, if needed

For your estimate, share this planner with room photos and your preferred timing.
